

Road Condition Advisory for the Public

We're asking everyone to help protect our roadways during this period of soft, greasy conditions.

Heavy Trucks

- Please **keep semi trucks off the roads after 11 a.m. whenever possible**.
- This includes **empty trucks**, as they are still causing ruts in several areas.

General Traffic

- Drive according to **current road conditions**, especially in soft or slippery sections.
- Many roads across the region are experiencing the **same greasy spots**, and they need **drying weather and time** before crews can grade them effectively.

Road Maintenance

- Our crews will begin grading as soon as conditions allow.
- Good drying weather is essential for the work to be successful.

Reporting Issues

- Please report concerns to **your division councillor**.
- Please ...**Do Not call Foreman or Outside Crew Members**
- Only report **extreme or urgent issues** to **office staff**.
 - When staff must check reports that turn out to be normal conditions for this time of year, it **slows down their work** on the roads.
